EDUCATION

University of Strathclyde

BSc Hons Computer Science

Glasgow, Scotland

Expected Graduation: 2027

Kings Park Secondary

Glasgow, Scotland

5th Year:

Highers: AAAAB

6th Year:

Highers: AA

Advanced Highers: AB

SKILLS/ EXPERIENCE

Programming Languages: Java, Python, C, SQL, HTML, CSS

Skills: Maven, Backend Frameworks (Spring Boot), Java, CI/CL pipelines, Unit Testing, Agile, RESTful APIs, Git, GitLab, GitHub, Full-Stack Applications, Object Oriented Programming

Certifications: JPMorganChase Software Engineering Job Simulation

NOTABLE PROJECTS:

Scotbank - At university, I am enrolled in a module run by JPMorganChase titled *Agile Software Engineering in Practice*, which simulates the full Agile methodology. This course follows the entire Agile development process, from selecting features from a product backlog to completing sprints with my team and conducting retrospectives. The project is a full-stack implementation of a banking application, utilizing RESTful APIs, CI/CD, and other modern development practices. While not the designated maintainer, I often assist teammates with Git-related tasks due to my experience with command-line Git and GitLab.

Simple Shell - A group project for my Computer Systems class, where we implemented a simplified shell interface for UNIX systems in C. This project deepened my understanding of low-level concepts such as system calls and process management.

Practical Python - A growing collection of small Python projects demonstrating practical skills, including a Steam game scraper with an optional web API and an invoice generator.

WORK HISTORY

Waterstones

Bookseller

Glasgow, Scotland

2022

Waitrose

Customer Assistant

East Renfrewshire, Scotland

2024 - Current
